The date shows when this volume was taken.

SEP 29 190 .

All books not in use for instruction or research are limited to all borrowers.

Volumes of periodicals and of pamphlets comprise so many subjects, that they are held in the library as much as possible. For special purposes they are given out for a limited time.

Graduates and seniors are allowed five volumes for two weeks. Other students may have two vols. from the circulating library for two weeks.

Books not needed during recess periods should be returned to the library, or arrangements made for their return during borrower's absence, if wanted.

Books needed by more than one person are held on the reserve list.

Books of special value and gift books, when the giver wishes it, are not allowed to circulate.

CANADIAN STATISTICS.

CENSUS OF 1880-81.

INTRODUCTION.

VOLUME SECOND.

This volume being the second of the series, but the third of the issue, comprises fifteen tables, and are numbered from VII. to XX. and an addendum A.

Table VII. being the first of this volume, gives the number of births during the twelve months immediately preceding the 4th April, 1881. The months in which such births occurred, and the sexes, when known, and when not known, adding them to the totals.

It must be remembered that in the births, deaths and other informations relating to the Provinces of Manitoba and British Columbia and the Territories, reliable informationis not obtainable, covering, as they do, a large Indian population. In British Columbia they were estimated and given in bulk.

Table VIII. Ages of the people are given as recorded year by year, and are counted from the last birth-day. The column headed under one year, therefore represents a greater or lesser fraction of a year, and those headed 1 to 2, 2 to 3, &c., successively, represent the numbers of persons living at one year of age last birth-day and two years of age last birth-day, &c.

Tables IX. to XIII. require no explanations.

STATISTIQUES DU CANADA.

RECENSEMENT DE 1880-81.

INTRODUCTION.

DEUXIÈME VOLUME.

Ce volume, qui est le deuxième de la série, mais le troisième publié, comprend quinze tableaux, numérotés de VII à XX, et un appendice A.

Le Tableau VII, premier de ce volume, donne le chiffre des Naissances arrivées pendant les douze mois précédant immédiatement le 4 avril 1881, le mois de ces naissances et les sexes quand ils sont connus. Quand ils sont inconnus on les ajoute aux totaux.

Il faut se rappeler qu'il est impossible de se procurer des informations valables concernant les naissances, les décès et autres renseignements relatifs aux personnes qui habitent les provinces de Manitoba, de la Colombie-Britannique et les Territoires du Nord-Ouest, ces provinces ayant une grande population de sauvages. Dans la Colombie-Britannique, ces chiffres ont été calculés approximativement et donnés en bloc.

Tableau XVIII. L'âge est donné, tel qu'il a été enregistré, année par année, et a été compté comme se référant au dernier anniversaire de la naissance. Ainsi, la colonne en tête de laquelle se trouvent les mots 1 an représente une des fractions plus ou moins grande d'un an ; les autres marquées de 1 à 2, de 2 à 3, etc., représentent successivement le nombre de personnes vivantes à l'âge d'un an au dernier anniversaire de la naissance, ou à l'âge de deux ans au dernier anniversaire de la naissance, etc.

Les Tableaux de IX à XIII ne demandent pas d'explications.

Table XIV. Occupations of the people are arranged alphabetically. Occupations somewhat similar to each other are necessarily separated one from the other in this mode of arrangement. But as it seems desirable and necessary to give the occupations followed in each district separately, it would be impossible, on account of the great space required, that the more specific form of arrangement by class-order and sub-order could be followed. At the end of the table is given a summary of the whole by classes.

Persons engaged in more than one occupation are assigned to that to which they appeared to attach the most importance, or to that which they happened to be following at the taking of the Census, hence it happens that an under-statement may be made in some districts of the numbers following a particular occupation.

The numbers specified as under certain trades and industrial pursuits generally include all engaged in them, laborers, apprentices, as well as masters and assistants.

Details in reference to the employment of the people are further supplemented in the third volume of this work under "Industrial Establishments," but it must be remembered that there cannot be any precise agreement between the two statements, they having reference to two states of facts, the one giving the number of hands employed at the several industries, it may be a week, a month or a year; the other giving that occupation to which the person devotes the principal part of his time.

As regards the female part of the population, it must be borne in mind that the enumeration does not give the occupations of all the females, but only so far as they were engaged in farming, as heads of families, servants, teachers, &c., &c. Females are engaged in many of the occupations named in the table, but to give them separately would occupy too much space.

The following tables, namely: the fifteenth, sixteenth, seventeenth, eighteenth and nineteenth, are devoted to the enumeration of the deaths reported to the enumerators. The same remark, as priviously made, in reference to the tabulation of the sexes, as regards Table VII., will be applicable here, namely, that when the sexes are not known the deaths are added to the totals. Table XV. includes the still-born in the general body of the table. Tables XVII. and XIX., the still-born occupy separate columns and are not added to the totals. The last Table has been compiled by Provinces; all the others are by districts.

The number of deaths recorded falls very much short of the actual yearly mortality, as will at once be seen and appreciated by anyone conversant with the subject.

Tableau XIV. Les occupations des personnes sont énumérées alphabétiquement. Les occupations qui ont quelque similitude sont nécessairement séparées l'une de l'autre d'après ce système de classement. Mais bien qu'il fût désirable et même nécessaire de mentionner les occupations suivies dans chaque district séparément, le grand espace que cela prendrait ne permet pas de suivre ce mode de classement plus précis. A la fin du Tableau se trouve un sommaire de toutes les occupations par classes.

Aux personnes engagées dans plus d'une occupation on assigne celle à laquelle elles paraissent attacher le plus d'importance ou à laquelle elles se livraient lors de la prise du recensement. De là pourra-t-il arriver que l'on trouve dans un autre tableau un nombre moindre de personnes se livrant à une occupation particulière.

Le nombre de personnes désignées comme exerçant certains métiers ou industries comprend tous ceux qui y sont employés, les ouvriers comme les apprentis, les maîtres comme les aides.

Sous le titre de " Etablissements Industriels," on a ajouté, dans le troisième volume de cet ouvrage, des détails relatifs aux divers emplois exercés. Mais il ne faut pas oublier qu'il ne saurait y avoir un accord parfait entre les deux exposés, vu qu'ils ont rapport à deux états de choses différents, l'un donnant le nombre de mains employées dans les diverses industries à la semaine, au mois ou à l'année, l'autre mentionnant l'occupation à laquelle telle personne donne la plus grande partie de son temps.

On devra se rappeler que, pour ce qui a trait à la partie féminine de la population, on n'énumère pas les occupations de toutes les femmes, mais seulement celles qui se livrent aux travaux des champs, qui sont ménagères dans la maison de la famille, ou qui sont institutrices ou servantes. Nombre de femmes se livrent à plusieurs des occupations mentionnées dans le tableau; mais en faire mention séparée prendrait trop de place.

Les Tableaux XV, XVI, XVII, XVIII et XIX sont consacrés à l'énumération des morts telles que rapportées par ceux qui sont chargés de les enregistrer. La même remarque que nous avons faite plus haut au sujet de la classification des sexes relativement au Tableau VII est applicable ici, c'est-à-dire que lorsque les sexes ne sont pas connus on ajoute les décès aux totaux. L'ensemble du Tableau XV contient les morts-nés; dans les Tableaux XVII et XIX ils sont entrés dans des colonnes séparées et ne sont pas ajoutés aux totaux. Le dernier tableau est compilé par Provinces, les autres par Districts.

The reported deaths for the several Provinces are :

Province of Prince Edward Island	14·27	per 1,000
" Nova Scotia	14·54	"
" New Brunswick	15·02	"
" Quebec	19·07	"
" Ontario	11·81	"
" Manitoba	12·34	"
" British Columbia	20·35	"

Table XX. is a statement of the number of churches belonging to the several denominations, the higher class of educational institutions, penitentiaries and gaols, with the number of inmates thereof on 4th April, 1881.

The addendum Table A. is a statement of the component parts of the several classes of occupations given at the end of the Table of Occupations (XIV.,) from which it is abstracted.

Two slight errors occurred in Vol. 1, by which the total number of widowed is erroneously increased by 142, and the number of children and unmarried are unduly diminished by that number.

This volume is furnished with two indexes of subjects; one in numerical, the other in alphabetical order. There is also an alphabetical table of subjects.

The index of sub-districts to the first volume is so framed as to serve for all, in the manner explained in the introduction to that volume.

It is proposed that a further report shall be issued, in which comparisons, ratios, proportions and deductions will b discussed; and such few errors as have been discovered will be rectified.

Comme le verra et le comprendra de suite quiconque s'est occupé de la question, le nombre de décès accusés dans ces tableaux comporte un énorme déficit comparé au taux réel de la mortalité annuelle.

Le nombre de décès consignés pour les différentes provinces est comme suit :

Province de l'Ile du Prince-Edouard	14.29	par	1000.
" de la Nouvelle-Ecosse	14.54	"	"
" du Nouveau-Brunswick	15.02	"	"
" de Québec	19.07	"	"
" d'Ontario	11.81	"	"
" de Manitoba	12.34	"	"
" de la Colombie Britannique	20.35	"	"

Le Tableaux XX contient un état du nombre des Eglises consacrées aux différents cultes, des institutions de haute éducation et des institutions pénales et de répression, avec le nombre des personnes qui en formaient la population résidente à la date du 4 avril 1881.

Le Tableau appendice A est un exposé des parties qui composent les différentes classes d'occupations mentionnées à la fin du Tableau des occupations, XIV, dont il est tiré.

Dans le premier volume se sont glissées deux erreurs par lesquelles le nombre de personnes veuves se trouve augmenté par erreur de 142, et le nombre des enfants et des célibataires ainsi diminué d'autant.

Le présent volume est muni de deux Index des districts, l'un d'après l'ordre numérique, l'autre d'après l'ordre alphabétique. Il contient en outre une table alphabétique des sujets.

L'Index des sous-districts inséré dans le premier volume de cet ouvrage a été fait de façon à servir pour tous les volumes en la manière expliquée dans l'Introduction première.

On se propose de publier un autre Rapport dans lequel on établira des comparaisons, on discutera les proportions et les déductions et dans lequel, enfin, l'on rectifiera les quelques erreurs que l'on aura pu découvrir.
